### 1 General Information

#### 1.1 Current Version and Editions

The following release notes document the upgrades and changes made to the newest version of the Aircraft Performance Program, APP 7.0.

There is one edition of the current version:

- Professional Edition: Maximum number of functionalities available over a broad range of installation preferences (e.g. stand alone, network)

The first release of APP 7.0 Professional Edition has been issued in December 2016.

The current release of the Professional Edition is R1.0 and has been issued in March 2019.

#### 1.2 List of Releases

This table lists all the releases and release dates for APP

Name/Version/Edition	Release Software	Protection	Description	Date
APP 7 Professional	0.0 (Beta Version)	WIBUKey by WIBU	Professional edition of the APP 7 program	December 2016
APP 7 Professional	1.0	WIBUKey by WIBU	Professional edition of the APP 7 program	March 2019

## 2 Version Release Notes

### 2.1 Fixes, Upgrades, Updates and Work done

The releases and the implemented updates, fixes and added features having been generated are listed in the table below:

Releases/ Fixes/ Updates	Version/ Release	Description
Beta	7.0 R0.0 Professional	Version 7.0 R0.0 ( <i>Beta Version</i> ) Professional Edition generated and released
<u>New Version</u>	7.0 R1.0 Professional	Version 7.0 R1.0 Professional Edition generated and released

### 2.2 Known Problems, proposed improvements

Please feel free to inform us if you encounter any bugs or have an improvement to propose to us.

Proposed Fix or Improvement	Description
Electric propeller propulsion for ground-operations, decelerate and descent segments	If the power setting of the electric motor is set to 0%, and the minimum torque is also 0, the propeller state might not have a solution. Choose a small amount of power (e.g. 10%) for ground-operations, decelerate and descent segments.
Mission segments for electric propulsion	Note that not all mission segments work with electric propulsion, notably ones that rely on a non-zero fuel flow (e.g. Cruise at best SR, Loiter at best FF, ...). Most segments however work with a hybrid propulsion, if the generator is in "Sustain Charge" mode.
High DPI screens	Some users with very large screens (high DPI) and high display scaling factors might experience slightly blurred user interface elements. For further information, see <a href="https://support.microsoft.com/en-us/kb/2900023">https://support.microsoft.com/en-us/kb/2900023</a> . Note that the option to <i>Disable Display Scaling On High DPI Settings</i> might result in clipped text and is not recommended.

### **3 Support**

#### **3.1 Getting additional information**

Either ALR or your reseller can help you with any problem you may encounter installing or using the APP 7 Professional Edition.

#### **3.2 How to Contact ALR**

Postal Address:

Phone:+41 (0)44 202 93 88

Arbeitsgruppe für Luft- und Raumfahrt

Gotthardstrasse 52

CH-8002 Zurich

Switzerland
